**Attachments:** Lymphohematopoietic Cancers and Formaldehyde (November 2015).docx; Upper Respiratory Tract Cancers and Formaldehyde (Just NPC and SNC November 16 2015).docx

I'm attaching the revised LHP section here. Two URT cancers are also complete (NPC and SNC). They are attached as well.

As for the hazard descriptors, I used the ones that the epi group developed for the NAS review a couple of years back. I hope those are still okay with IRIS.

The study evaluation table is 'done' but imperfect and needs some clean up. Nick is helping with that.

My goal is to complete the other cancers this week. I would appreciate someone checking if I missed any of the key advice from NAS. I feel like I have been stuck in the weeds for a long time.

Tom

**Subject:** update on human cancer sections?

Hi Tom,

We were hoping you could provide us with a quick update on when you expect to be able to send a revised draft of your formaldehyde sections? Nothing detailed is needed, but if you can estimate a date and let us know if there is anything we can do to help (or if you want us to ask David/ Bob to do something), that would be great.

And  
Thanks and Happy Monday!  
Barbara and Andrew
